Test block 18 Kg

The Matcon 18 kilo test weight is an ideal weight to test DC and permanent magnets whether they have sufficient traction (magnetic field) to demonstrate any indications in the workpiece to be inspected.

The weight is provided with a steel handle which is also part of the weight.

The weight has a unique serial number and comes with a calibration certificate. The weight has been edged all around so there are no sharp edges.

Specifications:

- Material: Carbon steel
- Dimensions: 240 x 178 x 75 mm
- Weight: 18,1 kilo
